

AerisGuard™ HVAC Performance Solutions

Coil Restoration

The AerisGuard Coil Restoration Program is a unique service that utilizes proprietary enzyme products to restore and protect commercial and industrial air handling systems. Our program is designed to reduce energy costs, decrease mechanical plant maintenance, restore system operational efficiency, improve indoor air quality and extend the life of your capital equipment.

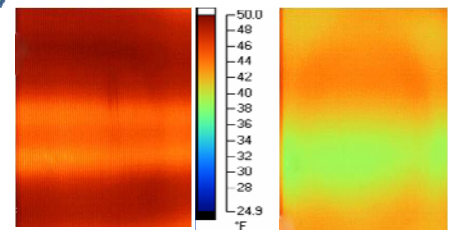

The AerisGuard Coil Restoration Program is a multi-step process :

Assess

Actual coil image before and after AerisGuard Restoration

AerisGuard Treatment

Decreased coil temperature after restoration equals decreased energy costs

Benefits of the AerisGuard Restoration Program:

Significant reduction in energy costs - up to 30%

Extended equipment life - estimated 10-15% improvement

Reduced maintenance costs
